## Neurological Vision Impairment Division

---

Hello!

Hoping everyone has had a terrific (and healthy) start to 2023. We're back in the thick of it school and work. It seems like there is never enough time to get everything done! We must continue to educate ourselves on new discoveries in the field, and learn from one another. Regarding that, we're featuring resources you can register and access and a few resources you can view whenever you have a minute. All good stuff... that we hope you can use to guide your practice.

---

### **Perkins School for the Blind Course: O&M through the CVI Lens Course starts March 18th**

From the site: This course will provide an overview of Cortical/Cerebral Visual Impairment (CVI) and its impact on Orientation and Mobility (O&M) instruction and assessment. Participants will gain an understanding of an overview of O&M and associated tasks in addition to an overview of CVI. Find out more information and register at this [link](#).

---

### **APH Connect Center: Supporting the Assessment Process for Children With CVI**

**February 7th at 3 pm EST**

Description: Children with CVI are varied in their expression of the condition. Join this webinar series to unpack The CVI Companion Guide, which helps educators understand the condition, document progress, and plan interventions. Register at the following link [Webinar Registration - Zoom](#)

---

### **TSBVI - Coffee Hours**

TSBVI has a wealth of great content in CVI and other topics as well. Check out previous Coffee Hours [here](#) when you have a chance!
